

Cultivating Knowledge and Success with Individualized Learning Strategies

Discover your strengths and pursue paths to new opportunities.

Learning Landscape is a private-practice Educational Therapy company that provides intensive, individualized educational interventions for the student with learning differences such as reading disabilities and attentional challenges.

Kristina R. English, M.Ed.
Educational Therapist & Reading Specialist

What is Educational Therapy?

Educational Therapy is an educational intervention that evaluates, defines and addresses an individual's pattern of learning strengths and deficiencies. It's the practice of providing individualized research-based remedial and compensatory learning strategies to enhance students' learning and academic outcomes. Self-advocacy skills are taught throughout the process.

Educational Therapy vs. Tutoring

Tutoring focuses on re-teaching academic subjects. This can be beneficial for students who are behind, need a little extra support to keep up, or have specific needs in particular subjects and who want to get ahead.

Educational Therapy addresses underlying causes of learning challenges and remediates these causes using scientifically-proven and research-based methods such as diagnostic teaching. Weak processing skills are identified and addressed.

Tutoring is product oriented and focuses on content, while educational therapy is more process oriented focusing on how we receive, process, and express new information.

Discover how you learn best. Capitalize on your strengths.

About Learning Landscape

Learning Landscape was founded in 2006 by Kristie English, M.Ed. Ms. English holds a Washington State teaching certificate for K-12 Special Education and a Reading Endorsement. She earned her graduate degree from the University of Washington where her studies and practicum focused on learning disabilities, reading, and the process of transitioning from high school to a post-secondary education.

Ms. English has worked extensively with adolescents in a variety of learning environments and has taught classes to middle and high school students through Education Access Network and other non-profit organizations for more than ten years.
